

Physical connection :

1. Types of medium?

1. Wired medium
2. Wireless medium

Wired medium :

Eg : UTP cable, used in LAN networks
Fibre optic cable - It is used light to transmit data at every high speed.

Wireless medium :

Data travels through the air without cables.

eg : Wi-Fi
Bluetooth

2.

3. Connect Utp cable between two devices.

Router pin:

Pc pin

1	3
2	6
3	1
4	4
5	5
6	2
7	7
8	8

4) Explain AUTO MDIX?

AUTO-MDIX stands for Automatic Medium Dependent Interface crossover.

AUTO-MDIX automatically detects the cable type and configures the port correctly. And it removes the need to manually use crossover or straight-through cables.

Date : _____

5. Explain POE Injector?

POE Injector Stands for power over Ethernet injector.

It supplies power and data through the same Ethernet cable to network devices.

6. What is a POE Switch?

POE Switch Stands for power over ethernet switch.

And A POE Switch provides both power and network data through the same Ethernet cable to connected devices.

7) Explain NIC & function?

NIC (network Interface card) is a hardware device that connect a computer to a network. Its main function is to send and receive data and provide a unique MAC address.
