

Date : _____

1. Explain uses of ping command in network?

~~Ping is a network utility used to test the reachability of a destination on an Internet Protocol (IP) network.~~

Uses :

- check connectivity,
- It will verify whether the destination device is reachable.
- Test communication.
- Troubleshoot network.

2. Explain NetBIOS protocol?

NetBIOS Stands for Network Basic Input/output System.

NetBIOS help computers communicate using computer names. It is mainly used in Windows LAN environments for file sharing, printer sharing, and resource sharing.

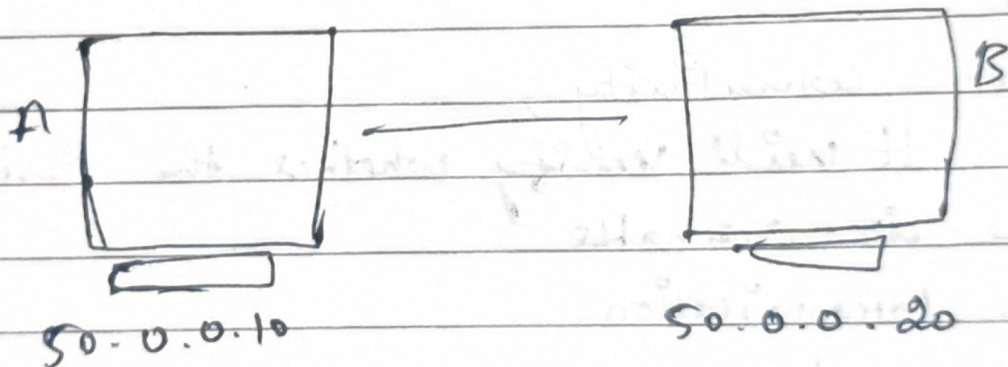

Date : _____

3. Explain SMB protocol.

SMB stands for Server Message Block

SMB is a network protocol used to share files, folders, printers and other resources between computers on a network.

4. Explain the ping process from 50.0.0.10 to 50.0.0.20.

Computer A (50.0.0.10) Sends an ICMP echo request packet to Computer B (50.0.0.20)

The packet moves through the LAN using the network switch.

Computer B receives the ICMP echo request packet.

Computer B Send an ICMP echo reply packet back to computer A

Date : _____

Computer A receives the reply and displays
Reply from 850.0.0.20.
